

# Quality & Traceability

From Supplier to You

---

Unleashing the power of blockchain  
to enhance our health products!

# A New Dawn in Medicine

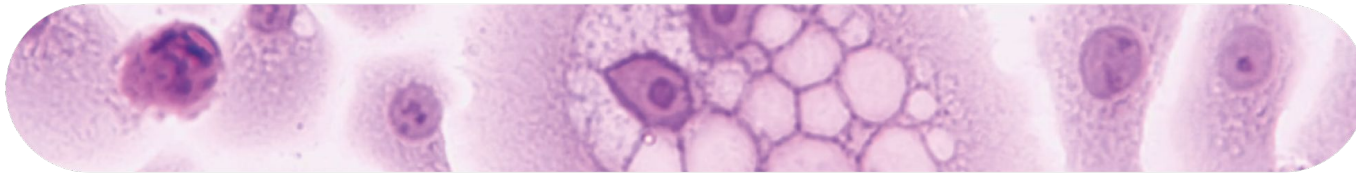

---

## **ATMPs**

Like giving your body's cells a superpower to fight diseases!

## **COI & COC**

Ensuring the superhero cells come from the right place, travel the right path, and reach the right person.

# Guidelines & Blockchain

A match Made in Heaven

---

**Blockchain in COI, COC, and CTA:** Think of blockchain as a superhero's diary. It records everything and forgets nothing!

# The Magic of Smart-Contracts & Blockchain

## Private smart-contracts

A secret spell that automatically does what it's told within a blockchain network.

## Blockchain

A magical ledger that makes the research data bulletproof.

# Donor Identification & Honesty in Donations

## Unique Identifier for Donors

Like a passport number, but for our superhero cell donors.

## Blockchain for Transparency

Think of it as a lie detector for donations, stopping the bad guys in their tracks.

# The Power of UUID

---

## UUID

A unique identity for every product, every step, every process!

## UUID for Resilience

Ensuring any healthcare system is always ready to spring into action, online or offline.

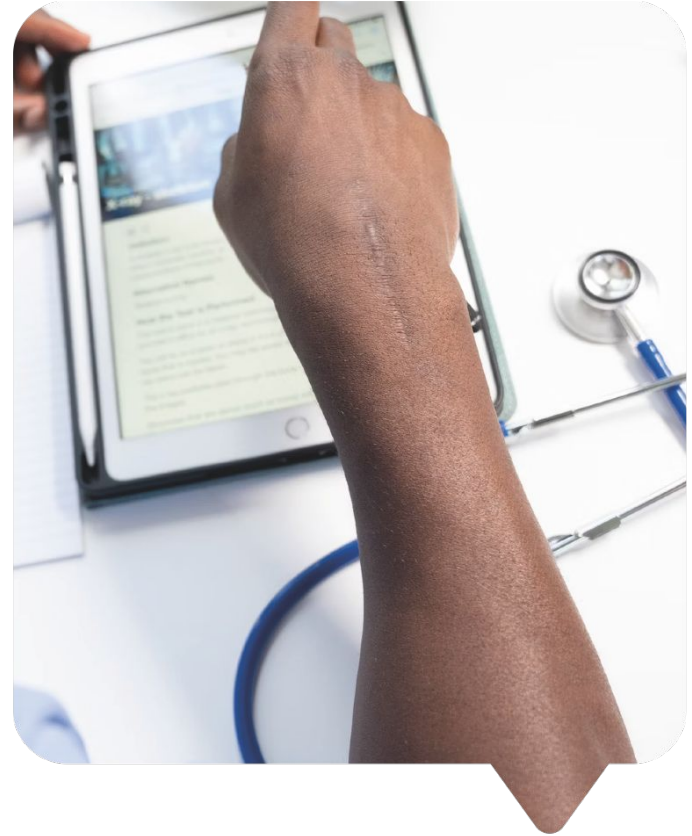

# Protecting Donor Health Records

---

**Sharing through your Universal Donor Identifier:** your health history like sharing a secret message.

**Anonymization for Research:** Turning donor data into a digital twin for research, keeping their real identity safe.

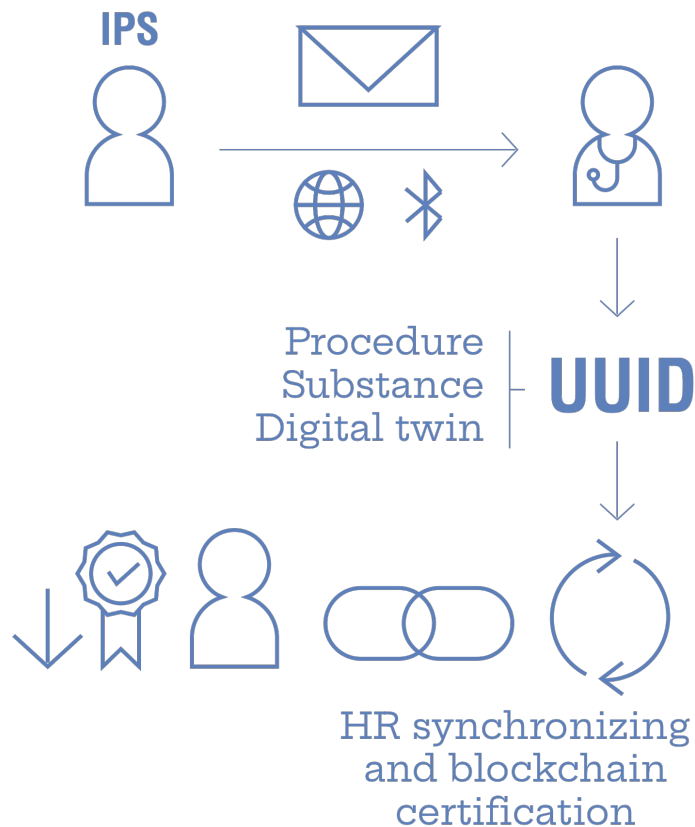

# The Future is Now

## FHIR Tools

standard which allow the collection of relevant medical data from the donor.

## Software in Healthcare

which is used to generate data related to the extraction procedure, raw material, and a digital twin of the donor.

# The Adventure Ends, A New One Begins

---

## **Creating a Digital Twin**

Imagine having a digital clone, living inside a blockchain universe.

## **Improving Research and Safety**

Updating your digital twin to fight diseases better and register any side effects transparently.

# Thank you
