

# Unleashing Healthcare's Future

- **Cross-border Healthcare:** A new frontier
- **Web 3.0:** Driving healthcare's digital revolution
- **The rise of the patient:** Their crucial role in healthcare data management

# DID: Power to the Patient

## **Decentralized Identity (DID)**

An introduction

## **The future is personal**

How DID hands  
the reins of data  
control to the user

## **Healthcare transformation**

Unveiling the  
immense  
potential of DID

# The Security Enigma: Solved

- **Quantum Resistant Encryption:** Fortifying healthcare data
- **The Blockchain twist:** The key to seamless identity verification
- **The ultimate goal:** Enhancing patient data security for a safer future

# IPS: Navigating Cross-Border Healthcare

- **The International Patient Summary (IPS)**

A beacon in cross-border healthcare

- **The IPS advantage**

Unleashing seamless healthcare across borders

- **HL7 FHIR**

Powering the IPS standardization, simplifying healthcare

# A Universal Key: Standardizing Data Access

- **FHIR API:** The magic key to universal healthcare data access
- **JOSE:** Safeguarding data, ensuring integrity
- **Transforming healthcare:** Standardizing data access, secure transmission made easy

# PQC: Fortifying the Healthcare Data Fortress

## **Post-Quantum Computing Cryptography (PQC)**

Welcome to the future of data security

## **The PQC advantage**

Unraveling unparalleled data security

## **Quantum-proof shield**

Why PQC is the key to resisting quantum computing threats

# Decentralized Identity: Revolutionizing Cross-Border Healthcare

- **DID Documents:** Crafting unique identifiers for a new age
- **Fortified security, streamlined verification:** The transformative potential of identifiers in cross-border healthcare
- **The DID revolution:** Rethinking identity verification through evidence creation and signing

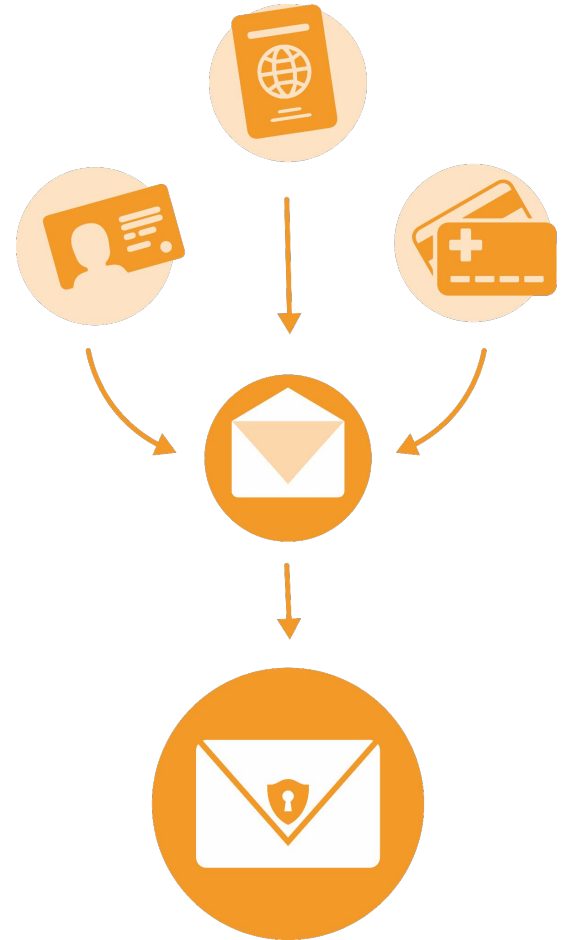

# A Visual Journey: Secure Data Exchange

**A picture** is worth a thousand words

**DIDComm messages:** The vanguard of secure data messaging

**Empowering healthcare:** Making diverse data formats and protocols work together

# Towards a Brighter Future

- **DID & PQC:** The dynamic duo securing patient data
- **Revolutionizing healthcare:** Impact of standardized data access on cross-border healthcare
- **The horizon beckons:** Embracing the future of healthcare with these advancements

# Thanks
